Energy Policy

The American College of Greece (ACG) is committed to the continuous improvement of energy efficiency, as part of its sustainability strategy. This commitment is materialized by the implementation of our Energy Management System, in accordance with the principles and requirements of ISO 50001: 2018, with the purpose to ensure the following:

- **Continuous improvement** of ACG's energy performance through the implementation of our Energy Management System and best practices on energy saving and environmental protection.
- Compliance with the National and European **Legislation** and with any other signed obligations regarding energy and environmental issues
- Providing **required resources** and information essential for the success of energy performance objectives within the scope of the Energy Management System
- **Design and operation of our buildings**, taking into consideration energy saving and performance, climate change policies, and resources savings in the whole life cycle of our services
- Support the purchase of high energy efficient **products and services**
- **Training, motivation and awareness** of ACG staff, faculty and students on energy and environmental protection best practices
- Annual **assessment** of our energy performance and resetting of our targets for continuous improvement
- Communicate our energy policy to our **suppliers and contractors** and ask them to comply with it

This policy has the valuable support and participation of our staff, faculty and students.

Edward C. Wingenbach, Ph.D
President
