MS IN COUNSELING PSYCHOLOGY & PSYCHOTHERAPY

AP 6010  PROGRAM DESIGN & EVALUATION  3 US CREDITS
This course covers research based program design, monitoring and proposal writing and provides an overview of the basic theoretical concepts and applied behavioral procedures used in the systematic determination of merit, worth, or significance of a particular therapeutic, educational, or other program, project or organization.

AP 6020  BIOLOGICAL BASIS OF BEHAVIOR  2 US CREDITS
This course provides an advanced level, review of the relationship of human physiology to behavior. The course begins with establishing an understanding of the micro & macro structure and functions of the central nervous system and their relationship to psychopharmacology, and then uses this foundation to explore specific topics, including emotion, anxiety, and related disorders, memory, learning, impulsivity, violence, and substance abuse.

AP 6021  PROFESSIONAL & ETHICAL ISSUES IN COUNSELING & PSYCHOTHERAPY  2 US CREDITS
The course cultivates professional awareness and introduces issues related to reflective practice. It covers such areas as professionalism, legal issues, statutes, administrative rules, and standards for practitioners in counseling and applied developmental psychology. It stresses the importance of recognizing one’s professional limitations, making referrals in any area(s) considered outside the boundaries of one’s professional capabilities.

AP 6022  DIVERSITY WORKSHOP  2 US CREDITS
This workshop aims at increasing self-awareness regarding diversity issues while preparing students to work competently with various groups representing diversity with respect to ethnicity, gender, socioeconomic status, disability, and sexual orientation in both therapeutic and preventive contexts.

AP 6023  QUALITATIVE RESEARCH  3 US CREDITS
A critical presentation of theory, method, and practice of qualitative research with an emphasis on its naturalistic and interpretive approach to the social world and human experience. A variety of research methods for data collection (case studies, interview, participant observation, life story) and analysis (phenomenological method, discourse analysis, grounded theory) are covered and linked to major theoretical paradigms ([post]positivism, hermeneutics, [post]constructivism, critical theory, and cultural studies methods).

AP 6024  INTERVIEWING TECHNIQUES  2 US CREDITS
This course exposes the students to several interviewing techniques in the field of counseling and applied psychology and aims at developing students' attending and listening skills, and the ability to respond therapeutically in a decision-making framework.

AP 6034  GROUP COUNSELING & PSYCHOTHERAPY  3 US CREDITS
The course reviews the basic principles guiding group therapy as an approach to helping people alleviate their personal distress and appreciate how they may have been thwarting their own best efforts to understand themselves and to achieve their goals. The focus is on identifying the key aspects of group counseling that lead to change. Major strategies and techniques are reviewed as they apply to most counseling groups, therapeutic approaches, and settings.

AP 6039  PRINCIPLES OF COUNSELING & PERSONAL DEVELOPMENT  4 US CREDITS
The course examines the philosophy, main theories, practices, and principles of counseling and psychotherapy. Topics include the counseling relationship, assessment and referral procedures, brief and long-term approaches, and legal, ethical, and diversity issues. The course involves both didactic and experiential learning modes and is designed to provide a bridge from theory to professional practice. An essential goal is to affect the awareness, knowledge base, and application of techniques, and to help the student determine career goals and assume professional ethical standards, roles, and responsibilities. Methods used include group interaction, self disclosure, case studies, and role-playing. All experiential techniques aim at increasing self-awareness and thus enhancing the prospective counselor's listening and guidance skills, as well as the ability for empathy and understanding.
AP 6042  HUMANISTIC & PSYCHODYNAMIC APPROACHES TO COUNSELING & PSYCHOTHERAPY  
3 US CREDITS

The course reviews major humanistic and psychodynamic theories and clinical approaches in counseling, psychotherapy and clinical practice. It also provides students with a history of the development of psychoanalytic theory and the innovations in clinical practice. Humanistic theories since Carl Rogers’ client centered approach up to now are also presented and discussed.

Through the use of audiovisual equipment students will have the chance to learn how psychodynamic and humanistic counseling is conducted and will be introduced to the major techniques of those approaches. The course reviews also the most important defenses mechanisms and the way they function and interfere with the therapeutic relationship.

AP 6043  ADVANCED ANALYSIS AND INTERPRETATION OF BEHAVIORAL DATA  
3 US CREDITS

An extension of basic concepts in statistics, this course is organized around advanced statistical topics such as analysis of variance (ANOVA), including single-factor independent measures and repeated measures designs, factorial ANOVA, multiple comparison procedures, the general linear model, linear and multiple regression, and some non-parametric tests. Emphasis is on the process of selecting an appropriate analysis for research data, performing it using statistical analysis software, interpreting output, and using APA style to write conclusions. Computer-based analysis is implemented using the Windows version of the Statistical Package for the Social Sciences (SPSS).

AP 6044  COUNSELING IN HEALTH SETTINGS  
2 US CREDITS

This course is an introduction to the study of psychological factors in health and illness, and the role of the counselor in health settings. It examines the major models, research methods, interventions, and issues in health psychology and behavioral medicine. Topics include stress-illness, compliance, psycho-immunology, bereavement counseling, social support, and coping with disorders such as cardiovascular disease, pain, cancer, gastrointestinal disorders, diabetes, and obesity.

AP 6045  ADVANCED PSYCHOPATHOLOGY  
3 US CREDITS

The purpose of this course is to review and comprehensively examine the scientific evidence related to issues of description, classification and academic study of human mental distress. The course explores various theoretical approaches and evidence-based information about the cause and course of the various disorders.

The course reviews major clinical conditions of adulthood. After defining the term of psychopathology, as well as exploring the differentiation between normality and abnormality, all psychopathological syndromes will be reviewed. The course explores current theoretical, etiological, and therapeutic viewpoints. The clinical diagnostic criteria as these are stressed in the diagnostic manuals DSM-IV-TR and ICD-10 will be elaborated, as well as the criteria for a meaningful differential diagnosis.

AP 6046  PSYCHOLOGY OF ADDICTIONS  
2 US CREDITS

This course introduces students to theories, techniques, and relevant research associated with the Psychology of Addiction. It surveys various aspects of addiction, namely substance abuse, eating disorders, gambling, self-injury, “love” addictions, and the Internet addiction encompassing both didactic and experiential approaches to addiction. It reviews DSM-IV diagnosis, assessment measures, treatment planning, and the application of empirically validated techniques to clinical situations focusing on addiction.

AP 6049  CBT APPROACHES TO COUNSELING AND PSYCHOTHERAPY  
3 US CREDITS

The focus of this course is to introduce students to the principles, theory and practice of Cognitive Behavior Therapy (CBT) to counseling individuals. It reviews the basic concepts, principles, techniques and new developments related to CBT. The course aims at helping the students develop a good theoretical understanding of this major school of thought in psychotherapy. It covers such areas as: Development and principles of CBT, CBT for Depression, CBT for Anxiety Disorders (in particular Panic Disorder), the role of therapeutic relationship in CBT, and schema-focused therapy.
This course has two parts: Part A provides students with the theoretical and practical basis for choosing and using the wide range of test and measurement data available to applied researchers. Particular emphasis is placed upon the criteria used to evaluate the adequacy of tests and assessments. Topics include reliability, validity, test construction and test adaptation for cross-cultural assessment. Part B is designed to cover the theory and practice of intellectual and personality assessment with an emphasis on the Wechsler scales, and the MMPI. Students administer, score, and interpret tests under supervision and are trained to write reports.

This course is designed to increase knowledge and skills for practice with crisis intervention.

This course presents principles of assessment and concepts for counseling a family or individuals as part of a family emotional system. It consists of a theory and practice approach focusing on levels of interactive functioning and relationship stress, including the formulation of therapeutic goals in conjunction with the “family life cycle” paradigm.

The practicum seminars are designed to provide supervision and consultation for the practicum experience along with discussion of professional development issues and responsibilities as a counseling psychologist. Topics examined through the consultation process include: case conceptualization, professional development, peer supervision, quality assurance, legal and ethical considerations, institutional dynamics.

A Thesis is undertaken by all students working individually and in consultation with a selected instructor who acts as their thesis advisor. Students are expected to develop their ideas and design a study based on their appreciation of the relevant literature. Students are required to present a research thesis proposal protocol to a three-member thesis committee and gain approval before proceeding with their study and collection of data for their Thesis. Research protocols involving the participation of human subject are also submitted to the Human Research Ethics Committee for approval.

Students work closely with their thesis advisor on the completion of the thesis, which is evaluated by three additional readers. An oral defense of the thesis is scheduled after its submission.

The thesis should demonstrate in-depth knowledge of the topic, evidenced by a thorough literature review and display of critical thinking skills, and by the demonstration of basic competencies in research design, data analysis, and interpretation.
