

DEREE COLLEGE SYLLABUS FOR: EC 4066 ECONOMIC METHODOLOGY							
(Previously EC 4666 Economic Methodology)							
(Updated Fall 2021)							
UK LEVEL: 6 UK CREDITS: 15 US CREDITS: 3/0/3							
PREREQUISITES:	None						
CATALOG DESCRIPTION:	Debates about method in economics. The development of a methodological consensus and its critics. Prescriptive and descriptive rational reconstructions of methodological theory and practice in economics. Credibility criteria and the post-modernist critique of positive economics. Alternative and heterodox economics.						
RATIONALE:	The positivist consensus that has hitherto bound economics into an orthodoxy has long been under question. The consequence is a proliferation of discussion on method, which has become almost a specialization in itself in economics. This course is essential to the prospective economist, not only because students must be aware of the issues preoccupying the profession, but also because they must become more sensitive to methodological issues related to economics as a scientific discourse.						
LEARNING OUTCOMES:	As a result of taking this course, the student should be able to: <ol style="list-style-type: none"> 1. Identify past and present methodological controversies in economics. 2. Analyze methodological issues currently discussed in economics. 3. Describe the methodological orthodoxy and its critics. 4. Apply concepts discussed in epistemology and philosophy to economics. 						
METHOD OF TEACHING AND LEARNING:	In congruence with the learning and teaching strategy of the college, the following tools are used: <ul style="list-style-type: none"> ➤ Classes are conducted as a seminar. The instructor lectures on fundamental issues and lays out the conceptual background. Students are asked to present articles and books in the context of class discussion. ➤ Office hours: students are encouraged to make full use of the office hours of their instructor, where they can ask questions and go over lecture material. ➤ Use of Blackboard, where instructors post lecture notes, assignment instructions, timely announcements, as well as additional resources. 						
ASSESSMENT:	<table border="1"> <tr> <td colspan="2">Summative:</td> </tr> <tr> <td>1st assessment: Individual project (2,600-2,800 words); individual presentation</td> <td style="text-align: center;">50%</td> </tr> <tr> <td>Final assessment: In-class written examination (Two-hour, closed-book, essay questions, comprehensive)</td> <td style="text-align: center;">50%</td> </tr> </table>	Summative:		1 st assessment: Individual project (2,600-2,800 words); individual presentation	50%	Final assessment: In-class written examination (Two-hour, closed-book, essay questions, comprehensive)	50%
Summative:							
1 st assessment: Individual project (2,600-2,800 words); individual presentation	50%						
Final assessment: In-class written examination (Two-hour, closed-book, essay questions, comprehensive)	50%						

	<p>Formative:</p> <table border="1" data-bbox="561 239 1352 275"> <tr> <td data-bbox="561 239 1162 275">Formative assignments</td> <td data-bbox="1162 239 1352 275">0%</td> </tr> </table> <p>The formative assignments prepare students for the examination and ensure that students are actively engaged during the term.</p> <p>The 1st assessment tests Learning Outcomes 2 and 4. The final assessment tests Learning Outcomes 1, 2, 3, 4, with emphasis on 1 and 3.</p> <p>The final grade for this module will be determined by averaging all summative assessment grades, based on the predetermined weights for each assessment. If students pass the comprehensive assessment that tests all Learning Outcomes for this module and the average grade for the module is 40 or higher, students are not required to resit any failed assessments.</p>	Formative assignments	0%
