CATALOG DESCRIPTION:

This course provides an overview of the development of local and international tax law for innovative financial products. It analyses and examines cases from the basic types of tax structured finance transactions, e.g. client driven and proprietary trade structures and will focus on cross border structures and illustrate the market sensitivity to tax changes.

RATIONALE:

Introduces students to the concepts of tax-driven innovative financial products and discusses their implications on investments and the response from the tax authorities worldwide. The course equips students with knowledge and skills to be able to recognise and understand the most important taxation issues that arise in investment decision making and engineering of financial products.

LEARNING OUTCOMES:

On successful completion of the module, the student should be able to:

1. Define and explain the tax and legal distinctions that lead to the creation of tax structured finance schemes for the purposes of tax arbitrage,
2. Explain the tax differences that lead to the creation of debt/equity tax hybrid schemes
3. Discuss cases of cross-border tax arbitrage,
4. Summarize the importance of international anti avoidance tax rules designed to combat aggressive tax structured finance schemes and discuss their limitations.

METHOD OF TEACHING AND LEARNING:

In congruence with the teaching and learning strategy of the college, the following tools are used:

- Class lectures
- Short assignments on various taxation issues in small groups in class.
- Analysis & Discussion of short cases in class.
- Office Hours: Students are encouraged to make full use of the office hours of their instructor, where they can ask questions and go over lecture material.
- Use of a Blackboard, where instructors post lecture notes, assignment instruction, timely announcements, as well as additional resources.
