

DEREE COLLEGE SYLLABUS FOR:					
ITC 4350 IMMERSIVE COMPUTING (Fall 2021)	3/0/3 UK LEVEL: 6 UK CREDITS: 15				
PREREQUISITES:	ITC 2088 Introduction to Programming <i>and</i> ITC 2197 Object Oriented Programming Techniques OR ITC 2053 Introduction to Game Programming ITC 3051 User Experience and Interaction Design				
COREQUISITES:	None.				
CATALOG DESCRIPTION:	Virtual, augmented and mixed realities; concepts in immersion, presence, and flow; approaches, tools and techniques; immersive technologies and paradigms; perceptual, cognitive, and symbolic aspects of the experience of VR and AR; impact on the user experience.				
RATIONALE:	The course explores immersive computing with a focus on augmented and mixed reality. Students get acquainted with approaches, techniques, ethical and moral concerns, and contemporary research in the field. The course offers the opportunity for practice with the development of digital environments, as well as the integration of virtual with physical content into hybrid environments.				
LEARNING OUTCOMES:	As a result of taking this course, the student should be able to: 1. Demonstrate understanding of extended reality (XR) types, attributes and infrastructures. 2. Evaluate the usability of supporting hardware. 3. Discuss contemporary practices and developments in the field. 4. Design and develop XR components and prototypes.				
METHOD OF TEACHING AND LEARNING:	In congruence with the teaching and learning strategy of the college, the following tools are used: <ul style="list-style-type: none"> • Lectures, class discussions, laboratory practical sessions and problem solving. • Office hours: Students are encouraged to make full use of the office hours of their instructor, where they can ask questions and go over lecture material. • Use of the Blackboard Learning platform, where instructors post lecture notes, assignment instructions, timely announcements, as well as additional resources. 				
ASSESSMENT:	<p>Summative:</p> <table border="1" style="width: 100%;"> <tr> <td>1st assessment: Research report review of a major aspect of contemporary XR</td> <td style="text-align: center;">20%</td> </tr> <tr> <td>2nd assessment: Portfolio of student work including project defense and presentation.</td> <td style="text-align: center;">10%</td> </tr> </table>	1 st assessment: Research report review of a major aspect of contemporary XR	20%	2 nd assessment: Portfolio of student work including project defense and presentation.	10%
1 st assessment: Research report review of a major aspect of contemporary XR	20%				
2 nd assessment: Portfolio of student work including project defense and presentation.	10%				

	<table border="1" data-bbox="581 107 1382 205"> <tr> <td data-bbox="581 107 1273 205">Final assessment: Individual project XR component or prototype or small-scale app// report</td> <td data-bbox="1273 107 1382 205">70%</td> </tr> </table> <p>Formative:</p> <table border="1" data-bbox="581 275 1382 310"> <tr> <td data-bbox="581 275 1273 310">programming problems</td> <td data-bbox="1273 275 1382 310">0%</td> </tr> </table> <p>The formative assessments aim to prepare students for the summative assessments and expose them to teamwork.</p> <p>The 1st summative assessment tests LO 1,2,3. The 2nd summative assessment tests LO 1,4. The final summative assessment tests LOs 1-4.</p> <p><i>The final grade for this module will be determined by averaging all summative assessment grades, based on predetermined weights for each assessment. If students pass the final summative assessment, which tests all Learning Outcomes for this module, and the average grade for the module is 40 or above, students are not required to resit any failed assessments.</i></p>	Final assessment: Individual project XR component or prototype or small-scale app// report	70%	programming problems	0%
Final assessment: Individual project XR component or prototype or small-scale app// report	70%				
programming problems	0%
