

DEREE COLLEGE SYLLABUS FOR: MA 2027 LINEAR ALGEBRA		3/0/3						
		UK LEVEL: 4 UK CREDITS: 15						
(FALL 2025)								
PREREQUISITES:	None							
CATALOG DESCRIPTION:	A course intended to provide mathematical background in the algebra of matrices and vector spaces. Main topics include methods of solutions of linear systems, vector spaces, linear transformations, inner products, eigenvalues, eigenvectors, quadratic forms, matrix decompositions, singular value decomposition, and applications.							
RATIONALE:	This algebra course deals with the study of linear systems, linear transformations, vector spaces, and matrix decomposition methods and diagonalization. It aims to provide students with a solid foundation in these concepts and their applications in various fields such as natural sciences, engineering, computer science, economics, finance, and other.							
LEARNING OUTCOMES:	As a result of taking this course, the student should be able to: 1. Use various techniques to classify and solve linear systems of equations. 2. Demonstrate understanding of the geometry of real vector spaces and compute bases for matrix spaces. 3. Utilize linear transformations and understand the concepts of orthogonality and diagonalization. 4. Apply various matrix decomposition methods to analyze, solve, and model real-world applications.							
METHOD OF TEACHING AND LEARNING:	In congruence with the teaching and learning strategy of the college, the following tools are used: <ul style="list-style-type: none"><li>• Lectures and class discussions.</li><li>• Homework assignments.</li><li>• Office hours held by the instructor to provide further assistance to students.</li><li>• Use of library facilities for further study and preparation for the exams.</li><li>• Use of the Blackboard course management platform to further support communication, by posting lecture notes, assignment instruction, timely announcements, formative quizzes and online submission of assignments.</li></ul>							
ASSESSMENT:	<div>Summative:<table><tr><td>1<sup>st</sup> assessment: Midterm examination (written, 1 hour)</td><td>30%</td></tr><tr><td>2<sup>nd</sup> assessment: Portfolio of student work</td><td>10%</td></tr><tr><td>Final assessment: Final examination (written, 2 hours)</td><td>60%</td></tr></table><ul style="list-style-type: none"><li>▪ The first assessment tests Learning Outcomes 1 and 2.</li><li>▪ The second assessment tests Learning Outcomes 1, 2, 3, and 4.</li><li>▪ The final assessment tests Learning Outcomes 1, 2, 3, and 4.</li><li>▪ The formative assessment aims to prepare students for the examinations.</li></ul><p>The final grade for this module will be determined by averaging all summative assessment grades, based on the predetermined weights for each assessment. If students pass the comprehensive assessment that tests all Learning Outcomes for this module and the average grade for the module is 40 or higher, students are not required to resit any failed assessments. Students are required to resit failed assessments in this module.</p></div>		1 <sup>st</sup> assessment: Midterm examination (written, 1 hour)	30%	2 <sup>nd</sup> assessment: Portfolio of student work	10%	Final assessment: Final examination (written, 2 hours)	60%
1 <sup>st</sup> assessment: Midterm examination (written, 1 hour)	30%							
2 <sup>nd</sup> assessment: Portfolio of student work	10%							
Final assessment: Final examination (written, 2 hours)	60%							
INDICATIVE READING:	<div>REQUIRED READING:<ul style="list-style-type: none"><li>• H. Anton, C. Rorres, A. Kaul, <i>Elementary Linear Algebra: Applications version</i>, 12<sup>th</sup> Edition (2019), Wiley</li></ul></div> <div>RECOMMENDED READING:<ul style="list-style-type: none"><li>• R. Larson, <i>Elementary Linear Algebra</i>, 8<sup>th</sup> Edition (2017), Cengage</li><li>• D. C. Lay, S. R. Lay, J. J. McDonald, <i>Linear Algebra and Its Applications</i>, 5<sup>th</sup> Edition (2016), Pearson</li></ul></div>							

INDICATIVE MATERIAL:	<p><b>REQUIRED MATERIAL:</b> N/A</p> <p><b>RECOMMENDED MATERIAL:</b></p> <ul style="list-style-type: none"> <li>• College Mathematics</li> <li>• Mathematics Magazine</li> <li>• American Mathematical Monthly</li> </ul>
COMMUNICATION REQUIREMENTS:	Oral and written communication skills using academic / professional English.
SOFTWARE REQUIREMENTS:	<p>MS Office and Blackboard CMS.</p> <p>Python (<a href="http://www.python.org">www.python.org</a>) or Scilab (<a href="http://www.scilab.org">www.scilab.org</a>)</p>
