MK 2030 Introduction to Marketing **or**
MK 2030 Fundamentals of Marketing
MA 2021 Applied Statistics
BU3233 Business Research Methods

CATALOG DESCRIPTION:

Marketing research as a tool for decision- making and problem-solving in marketing. The research process. Research design and methodology, design sample, data collection, analysis and interpretation of data in specific marketing applications.

RATIONALE:

Managers are increasingly turning to marketing research to provide more reliable answers not only to marketing problems but other business problems as well. Marketing research is crucial to the adoption of a marketing philosophy by organisations. It provides a link between the consumer and public, through information that is used to identify and define marketing opportunities and marketing problems, to initiate marketing action, to monitor marketing performance, and to improve understanding of marketing as a process.

The module addresses the stages of the marketing research process, from identification of a problem and definition of the research objectives, to the presentation of research results. It also equips students with the knowledge and skills to write advanced marketing project writing. In particular, the module focuses on the issues of defining marketing research problems, identification of data requirements and sources, choice of research design, data collection, data analysis and presentation of results. A practical perspective through a research project where students have to prepare a research report on the basis of secondary and primary data collection.

LEARNING OUTCOMES:

On successful completion of the module, the student should be able to:

1. Critically evaluate the various methods of marketing research and how they apply to specific marketing issues.
2. Develop research designs on the basis of a brief relating to a marketing issue, including research objectives and methods, sampling, the development of research instruments and data collection.
3. Critically analyze research findings and discuss the recommendations for marketing decision-making.

	<p>4. Collect secondary data relevant to the research project topic.</p>												
<p>METHOD OF TEACHING AND LEARNING:</p>	<p>In congruence with the teaching and learning strategy of the college, the following tools are used:</p> <ul style="list-style-type: none"> ➤ Class lectures, participation and discussion of marketing cases and practical problems solved in class. ➤ Training on the SPSS statistical program for quantitative data analysis. ➤ Individual assignments. ➤ Office Hours: Students are encouraged to make full use of the office hours of their instructor, where they can ask questions and go over lecture material. ➤ Use of a Blackboard learning platform, where instructors post lecture notes, assignment instructions, timely announcements, as well as additional resources 												
<p>ASSESSMENT:</p>	<p>Summative:</p> <table border="1" data-bbox="638 741 1446 1031"> <tr> <td data-bbox="638 741 1000 932">Marketing research project (maximum 3,000-3,500 words)</td> <td data-bbox="1000 741 1344 932">Methodology and data collection (50%, group report); Data analysis, findings and recommendations (40%, individual report)</td> <td data-bbox="1344 741 1446 932">90%</td> </tr> <tr> <td data-bbox="638 932 1000 1031">Student portfolio of diagnostic assessment</td> <td data-bbox="1000 932 1344 1031">Collection of secondary data relevant to the research topic</td> <td data-bbox="1344 932 1446 1031">10%</td> </tr> </table> <p>Formative:</p> <table border="1" data-bbox="638 1094 1446 1283"> <tr> <td data-bbox="638 1094 1000 1157">Research proposal on group basis</td> <td data-bbox="1000 1094 1344 1157"></td> <td data-bbox="1344 1094 1446 1157">0%</td> </tr> <tr> <td data-bbox="638 1157 1000 1283">Course work</td> <td data-bbox="1000 1157 1344 1283">Class discussion of cases and real-life applications, assignments, “diagnostic” test</td> <td data-bbox="1344 1157 1446 1283">0%</td> </tr> </table> <p>The formative course work aims to prepare students for the research project.</p> <p>Learning Outcomes are tested as follows:</p> <ul style="list-style-type: none"> - LO1 is tested by the research project (group & individual activity). - LO2 is tested by the group report of the project. - LO3 is tested by the individual report of the project. - LO4 is tested by the portfolio of diagnostic assessment. <p>Students are required to resit failed assessments in this module.</p>	Marketing research project (maximum 3,000-3,500 words)	Methodology and data collection (50%, group report); Data analysis, findings and recommendations (40%, individual report)	90%	Student portfolio of diagnostic assessment	Collection of secondary data relevant to the research topic	10%	Research proposal on group basis		0%	Course work	Class discussion of cases and real-life applications, assignments, “diagnostic” test	0%
Marketing research project (maximum 3,000-3,500 words)	Methodology and data collection (50%, group report); Data analysis, findings and recommendations (40%, individual report)	90%											
Student portfolio of diagnostic assessment	Collection of secondary data relevant to the research topic	10%											
Research proposal on group basis		0%											
Course work	Class discussion of cases and real-life applications, assignments, “diagnostic” test	0%
