CATALOG DESCRIPTION:

An overview of the aging process from a psychological perspective through the study of major theories of aging, changes in physical and mental health, personal transitions, and social relationships, as well as death and dying. Critical presentation of cultural influences on parenting and sexuality.

RATIONALE:

The module aims at familiarizing students with basic developmental aspects of aging, theoretical perspectives, and research. For the future developmental, clinical, and counselling psychologist as well as social scientist who wants to gain insight into the major developmental issues of adulthood through the end of life.

LEARNING OUTCOMES:

Upon completion of the module, the student should be able to:

1. Examine the life-span developmental perspectives and review the relevant research methods used in the area.
2. Analyse the basic changes in biological, cognitive, personality, and social processes that accompany aging.
3. Discuss transitions related to aging and cultural influences on death dying and bereavement.
4. Identify, evaluate, and debunk myth-making that perpetuates ageism.

METHOD OF TEACHING AND LEARNING:

In line with the teaching and learning strategy of the college, the following tools are used:

- Classes consist of lectures, video and audio presentations, and in-class demonstrations
- In class discussions of case studies
- Use of Blackboard site
- Office hours

ASSESSMENT:

Summative:	
1st assessment: "Myth paper "on selected controversial topics and myths.	30%
